State-level data for understanding child welfare in the United States

Foster Care

Federal Fiscal Year 2017

Children are placed in foster care when a child protective services worker and court have determined it is not safe for them to remain home. Many children are traumatized by displacement from their family and disruption of their usual routine and familiar surroundings. Children in foster care need strong relationships with caring adults, a network of social support, and services to cope with the challenging circumstances of home removal.
