PROUD is run by peers in recovery who can help you find long-term success on a daily basis.

Advantage Behavioral Health Systems' opioid treatment team, **PROUD**, is a system of care that links each individual to the appropriate treatment and recovery

supports. Whether a person needs detox and stabilization, residential treatment, out-patient educational groups, individual counseling, or a combination of services, **PROUD** can help.

Recovery is a deeply personal journey. **PROUD** provides direct support for people seeking connection, stability and recovery. All **PROUD** staff are Certified Addiction Recovery Empowerment Specialists (CARES). Trained as recovery coaches, CARES support many pathways to recovery and advocate for individuals seeking wellness. The **PROUD** Team understands how active addiction destroys lives and relationships, but, more importantly, each team member knows first-hand how sustained recovery can restore hope for the future.

PROUD Team Members work to engage a person with opioid use disorder in various treatment and recovery services, over a longer period of time through the following:

- a person-centered approach
- family support
- peer groups
- individual check-ins
- connection and recovery

Medication Assisted Treatment (MAT) is available through PROUD at no cost to individuals with opioid addiction who meet criteria.
